

product name

LED Plant Grow Light GP-ZUP38001

product desc

**Name:** LED Plant Grow Light GP-ZUP38001

**Model:** GP-ZUP38001

### **Description?**

Input Voltage?AC90-260V

Power Dissipation?15W

Drive Mode?Constant-voltage drive,infrared remote control light-dimmer

LED type:5mm LED

Color: all red,red 150 blue 36

Angel:~140°

LED quantity:186PCS

Light life: 50000H

Wavelength:Red 610-720nm;Bule 400-520nm

Performance Parameter?

crust?spar glass/matte glass

Dimension??122mm,H135mm

color:glass silver

operational temperature?-20??60?

storage temperature?-30??70?

Environmental parameter?keep the indoor ventilation?nocorrosive gas and avoid sunshine directly

ingress protection grade?Non-waterproof IP60

### **Product Features?**

LED plant grow light is a new-type plant growth fill light which adopts semiconductor lighting technology and specializes in vegetable and flower production.After testing,the red and blue wavelengths of plant grow lights are very suitable for the growth,bloom,bear of vegetables and flowers.Since blue can hasten the leaf growth and red is beneficial to bloom and bear.The lamp is equipped with infrared remote control to adjust the brightness of red and blue light.The number of red and blue light can be equipped with according to the special requirement of the light.

**Special Statement:**

One who is not a professional does not dismantle the lamp to detect, maintenance or repair. If the lamp is not working. Avoid being electric shock. The warranty of the lamp under normal use is one year. In case of a problem of quality, call our company for free repair or replacement.
